Seasoned Aerospace Executive John R. Reimers Picked As President & CEO of Aviation Partners Boeing

*Revolutionary Blended Winglet Technology Transforms
Operating Economics for Air Carriers Worldwide*

March 14, 2006, SEATTLE, WA. John R. Reimers has been named CEO of Aviation Partners Boeing. Reimers most recently was Chairman and Chief Executive Officer of Compass Aerospace Corporation a primary supplier to Boeing, Airbus, Lockheed, Sikorsky and the U.S. Department of Defense.

“We are absolutely delighted to have an executive of John R. Reimers' qualifications and enthusiasm to lead Aviation Partners Boeing into the future,” says Aviation Partners Boeing Founder & Chairman Joe Clark. “Our Blended Winglet Technology has achieved proven leadership with airlines world-wide; saving fuel, increasing performance and improving economic value of both existing and new airframes. John will help us continue this success and maximize new opportunities for this revolutionary technology.”

Prior to Compass, Reimers served over 15 years in a variety of senior management positions for Teledyne Corporation. Previously, Reimers was Senior Business Advisor at Teledyne's corporate headquarters in Los Angeles, CA with the Aerospace & Electronics segment. In addition, he served as senior VP at both the Teledyne Ryan facility in San Diego and the Brown Engineering facility in Huntsville, AL.

Aviation Partners Boeing, a joint venture between Aviation Partners Inc. and The Boeing Company, is the world's leading designer, manufacturer and marketer of Advanced Technology Winglet Systems. Blended Winglets, patented* in 1991, are uniquely effective technology and will improve the performance and operating economy of any make or model of commercial aircraft. Currently, nearly 1,000 Boeing-manufactured aircraft are flying with Aviation Partners Boeing Blended Winglets.
